## OM Brass Manufacturers

Providing High grade Brass Components for CPVC & PPR Pipe Fittings

Paresh Parmar, CEO

Brass is one of the most commonly used materials in the world with a wide range of applications. Today, brass made components have also gained wide acceptance across multiple industrial segments, thanks to its unmatched durability. That being said, the Indian brass component industry is now battling with multiple hurdles such as price hike and supply chain disruption. Owing to the ongoing challenges, procurement of high quality brass components has turned out to be a major problem for the clients. According to a poll done by the Indian Journal of Research, 56 percent of respondents believe that poor quality is a key impediment to the overall growth of the brass component industry.

Strategically placed in Jamnagar, **OM Brass Manufacturers** has been continually solving the quality challenge for its clients. Today, all the brass components manufactured by the firm pass through stringent quality tests, which not only ensures the quality but also assures the longevity and durability of the products.

"At OM Brass Manufacturers, we ensure that all of our products meet the highest quality standards to ensure maximum ROI to our clients. Our firm is currently manufacturing and exporting Brass Components in India and also abroad like UK, Saudi Arabia, USA, Germany, Turkey, Russia, Europe, Australia, Singapore, Japan and many other countries," says Paresh Parmar, CEO at OM Brass Manufacturers.

### Quality Assured Products

Being an ISO 9001:2015 certified firm, OM Brass Manufacturers adhere to all international quality standards for product specifications and overall manufacturing process-

es. Starting with the procurement of the raw materials, the firm ensures to use only the best quality imported brass Scrap, which are exclusively sourced from UAE, USA and UK. Moreover, the firm has set its own in-house quality control segment, wherein all the products manufactured by the company go through stringent quality checks. "We have an in-house quality control room with spectrometers, projectors, and equipment such as micrometers, verniers, and dial gauges, among other things. We also carry a variety of ring gauges and plug gauges for thread inspection," said Paresh Parmar.

"We also have our own facilities for Nickel Plating, Zinc Plating, brass plating, TIN plating. We keep an up-to-date record of quality standards. We conduct visual inspection in order to ensure 100 per cent visual defect free products," he adds.

With time, OM Brass Manufacturers has developed a highly skilled and experienced team of professionals, who with their in-depth knowledge is ensuring to meet each and every demand of the customers with absolute precision. Serving Brass Male & Female Inserts for CPVC & PPR Pipes Industries

At OM Brass Manufacturers, we ensure that all of our products meet the highest quality standards to ensure maximum ROI to our clients.

Today, OM Brass Manufacturers serves Brass Male & Female Inserts / Adaptors for CPVC Pipes & PPR Pipes Industries and also many other Brass turned components manufacturing as per customer's drawings and samples specifications. In the future, OM Brass Manufacturers plans to continually upgrade the quality of its products, by adhering to the updated manufacturing practices. Moreover, the firm also wants to increase its bracket of offering with an undivided attention towards on time delivery and competitive pricing. ||
